Btw had a harrowing experience at Istanbul when @peppytravelgirl and I decided to extend our trip and explore Turkey by ourselves! We landed back at Istanbul airport around 1am and booked an Uber. The driver made us exit the airport saying he didn't want to pay the parking fee. We should've ideally cancelled the cab but we were exhausted so we went with him. Five mins into the trip he stopped and asked us to pay by cash to which we said we've already paid on Uber. He cancelled the trip and left us on the side of the road with our bags at 2am!!! Luckily we had an e-sim with data so we booked another Uber and the driver turned out to be a sweetheart!

So ideally, always have an active sim especially if you're travelling by yourself. We used the @raizingsim data plan that has an e-sim and can be activated from anywhere in the world! Really saved us the time!!

While in Europe, I've been trying something new to stay online and stay connected - @raizingsim

It's an eSIM that has coverage in over 150 countries, and activates with a simple scan!

So far I've used it in France and Italy and it has worked flawlessly in both the countries!

discoverwithanisha Tired of overpriced international roaming and the hassle of buying a local SIM at every airport? Been there, done that. But guess what? There's a smarter way!

Follow @discoverwithanisha for more travel hacks.

Here's how I stay connected hassle-free while traveling abroad:

- ✓ No more standing in long queues for local SIMs
- ✓ No more losing my primary SIM while switching
- ✓ No more paying for expensive roaming plans
- ✓ Instant eSIM activation in 150+ countries
- ✓ Strongest network coverage - even in remote places!
- ✓ Eco-friendly travel - no more plastic SIMs
- ✓ Best Customer care support ever!

I used @raizingsim during my Thailand trip, and it even worked at the highest points of Thailand & even in remote villages!

Does anyone travel

First things first!

We got ourselves an eSIM from @raizingsim

You get extensive coverage in 150+ countries

- Destination Covered in One Single Recharge For Europe - Austria - Belgium - Bulgaria - Croatia - Cyprus - Czech Republic - Denmark - Estonia - Finland - France - Germany - Greece - Hungary - Iceland - Italy - Latvia - Lithuania - Luxembourg - Malta - Netherlands - Poland - Portugal - Romania - Slovakia - Spain - Sweden - Norway - Iceland - Switzerland - Liechtenstein - Ukraine - Turkey

A few things to remember when you're traveling in Turkey -

- Cards are accepted pretty much everywhere

- Flights are the fastest way to travel between cities, but there are overnight buses and trains as well

- Public transport is quite sorted in Istanbul, but you'll have to book transfers in places like Cappadocia

- Don't hail yellow cabs - they quote exorbitantly. Use Uber to book taxis if you need to.

- Get an ESIM. I used @raizingsim's data 1-only plan - it was very easy to install and started working immediately. Super useful to book taxis, saves time and hassle as well.

FIRST ORDER OF BUSINESS

Get a SIM card

The time we spent for @raizingsim Global eSIM and it was extremely convenient with excellent coverage.

Head over to their page to get yours

Also here's a quick travel recommendation for you all. The four of us were using @raizingsim through the trip for data connection. It's an e-sim network that operates in 150+ countries including some remote ones and the best part is, you just need to install it once. Post that you can just recharge according to the local data plan of the country you are visiting and disconnect it once you are back. No trips to sim card stores in foreign countries anymore! Also they customise plans for you say if you are visiting 4-5 countries at once. What a boon it was throughout the trip. Fully recommend

Also before I forget! All of us on the trip were using eSIMs from @raizingsim. It's excellent and I've used it in over 8 countries by now including some very offbeat ones. It has always worked perfectly! You can just activate the same eSIM since you recharge a different country and recharge the data and it works! You don't need to buy a separate SIM each time and that is a huge advantage!
